For the Single-Family Housing Program, the Committee relies upon population estimates released by the Demographic Research Unit in the Department of Finance, which is designated as the single official source of demographic data for State planning and budgeting. This number differs from the population estimate released by the U.S. Census Bureau which the Committee uses to determine the annual State Ceiling as required by federal statute. The Department of Finance data is used to determine local issuers' fair share because it includes a complete breakdown of California's population by city and county, which the U.S. Census Bureau data does not include.
